GRAINS RESEARCH UPDATE

BOOSTING PROFITABILITY – RESILIENT SOLUTIONS

GRDC
GRAINS RESEARCH
& DEVELOPMENT
CORPORATION

Minnipa Agricultural Centre, 226 McKenzie Road, Minnipa, SA

Wednesday 31st July 2019

9.00 am to 1.00 pm followed by lunch (doors open at 8.30 am for a 9.00 am start)

Topics

► **New generation and adapted wheat and barley varieties**

Variety options for a range of sowing times to minimise the impact of frost and heat stress

► **On-farm grain storage – looking at the options for maintaining grain quality**

Storage options that provide flexibility to meet market requirements

► **Cost effective outcomes for ameliorating sandy soils**

Potential of ripping and spading to deliver cost-effective productivity improvements to 'sandy soils' within this region. Plus other lower cost options such as edge-row spacing to improve crop performance

► **Sustaining our herbicides into the future**

Update on research work that particularly relates to the Upper Eyre Peninsula with a focus on brome and barley grass.

► **A profit first approach to precision agriculture**

Decision making process to ensure profit outcome when considering introducing precision agriculture into the system

► **Following lunch (1.45 pm – 4.00 pm) Grain Producers SA (GPSA) will be hosting a consultation session with producers which will cover the Grain Industry Blueprint as well as the CFS harvest and stubble burning codes of practice.**
