Prepare to perform

Focusing on what really matters simplifies decision making and can help you and your team prosper. Kate discusses taking control and managing what's in your 'stress bucket' to maintain performance in high demand periods and help you get the most out of every day.

From the founder of the ifarmwell website and podcast, Kate will share practical skills and strategies to set yourself up to kick more goals.

Kate Gunn, Department of Rural Health, University of South Australia

Global market update – what are the risks and opportunities?

Is the era of globalisation coming to an end and how would that impact the Australian grains industry?

Get the latest insights on the drivers and triggers affecting commodity prices and supply chains.

Nick Carracher, Lachstock Consulting

Increasing scale vs diminishing return

At historically high land purchase and leasing costs – does increasing scale align with your business health and capability?

Considering potential implications for expanding farm business scale in an environment of diminishing return. Ben will assess the strategic, operational, and financial fit of a property purchase or lease.

Ben Hogan, ORM

Benefits of diversity

Your business's ability to perform and grow depends on having the right skills in the right place. Progressive agribusinesses recognise that leaders start as learners and the best person for the job might not fit the traditional type.

So, have you got the players your team needs to perform now, and into the future? Jeanette will outline how harnessing diverse skill-sets of family or staff can establish and reinforce pathways for growth, even through to generational transition.

Jeanette Long, Ag Consulting Co

ACHIEVING A PROFITABLE CROP IN A HIGH INPUT COST ENVIRONMENT

Tactical decisions to consider at this point in the season

Capturing key field data to inform profitable decisions

In the age of information overload - what data is valuable and how do we get more out of what's on hand? Jessica explores the key field data you can use to help inform profitable decisions – whether you're coming from a high- or low-tech position.

Jessica Koch, Breezy Hill Precision Ag Services

Topping up Nitrogen

What will it cost to increase yield from here and is the return-on-investment worth it? Jana looks at the mid-season economic analysis to find the profit 'sweet spot' and highlights fertiliser accumulation strategies to meet your predicted needs.

Jana Dixon, Pinion Advisory
