GRAINS RESEARCH UPDATE

Maitland Bowling Club, 8 Elizabeth Road, Maitland SA

9.00 am to 1.00 pm followed by lunch (doors open at 8.30 am for a 9.00 am start)

Topics

► **Future proofing herbicide efficacy**

Discover the status of ryegrass resistance and how to best future proof existing chemistry. Sam provides insight into ryegrass control strategies based on data from Random Weed Surveys.

Sam Kleeman

Plant Science Consulting

► **Strategies for post amelioration sowing and crop establishment on sandy soils**

Start optimising your crop establishment on sandy soils. Tackle hard pans and exclusion zones by implementing post sowing amelioration strategies. Mel Fraser provides guidelines and recommendations for the first-year post amelioration.

Mel Fraser

Soil Function Consulting

► **The market and agronomic challenges of carbendazim usage**

Discover the market implications for off-label usage of carbendazim. Our expert panel dives into the local practices, implications of carbendazim usage and strategies for effectively managing snails.

Panel of industry experts

► **The economics of fungicides in lentils**

Its time to weigh up the economics of your fungicide options in lentils. Sara explores the latest options on the market and how they fit within a broader disease management strategy.

Sara Blake

SARDI

► **Canadian Farming Systems – building farm resilience**

Gain an international perspective when building farm resilience. Sheri Strydhorst (Canadian agronomist) will provide strategies for nitrogen use efficiency, yield stability and optimising net economic returns.
